Greetings to Our Customers and Friends:

On this New Year's Day we extend to all our customers and friends the "season's greetings." We wish you a very happy, prosperous and successful new year.

We have re-written and revised this catalog and made it right up to date. Some stocks have been discarded and others of increased value added.

We have made prices very low, although increased costs and some short crops really do not warrant it, but we'll hope to gain by increased business.

Remember, our motto is "Quality First," then prices as low as we can make them. We are catering to the planters, gardeners and poultry and pet stock keepers that appreciate "Highest Quality" and good service. We are in close touch with the world's best markets and know that our "prices" and "quality" are right. Thousands of our customers testify to this. You will find a few reports scattered throughout this catalog. These unsolicited reports are encouraging and our rapidly increasing business leads us to believe we are supplying satisfactory stocks and giving efficient service. See illustrations of our East and West Side Salesrooms, inside front cover.

We certainly appreciate the support given us and thank you sincerely for past orders, and hope that we will have the pleasure of serving you again this year.

CORRESPONDENCE.—We try to give prompt attention to all proper letters of inquiry, etc., but ask, as a favor, that all questions be stated clearly and briefly, and not on order sheets.

OUR TERMS ARE STRICTLY CASH.—NO. C. O. D. SHIPMENTS.—The proper remittance must in all cases accompany the order Send money by bank draft, postoffice or express money order. Personal checks if O. K., also postage stamps for small amounts. We will not be responsible for stamps or coin sent in unregistered letters.

LARGE ORDERS.—Any gardener, institution or individual wishing seeds, plants, trees or supplies in large quantities is requested to mail a list of what is wanted, stating grade, size or amount, and we will promptly return it with our very lowest prices. A letter of inquiry may save you dollars if you want to buy in QUANTITY, or some PARTICULAR STOCKS.

PREPAY STATIONS.—When you send in orders to go by freight or express be sure you send extra money to pay the transportation charges if your station is a prepay point, which is always the case where there is no regular agent. If you send more than enough, we will refund it as soon as we get the prepay bill. If not enough, we will write for the balance and expect you to remit promptly.

SEASONABLE STOCKS.—Many customers order plants and bulbs out of season—that is, before we get stocks in or perhaps too late in the spring. Rather than delay the balance of your order, we will send what is seasonable at once and defer the balance until proper planting season unless otherwise instructed.

REPORTS—GOOD OR BAD.—Will you help us to attain greater success by writing and telling us how your Seeds and Supplies reach you, how they grow and how you like them? We will certainly appreciate it. Your criticisms, if you have any, as well as your praises, are desired.

MISTAKES.—These will happen occasionally, in spite of all care. Write us at once, with copy of original order, if possible, and mistakes will be promptly rectified.

NOTE.—We use every precaution in procuring fresh, pure and reliable seeds, etc., but we, in common with other responsible seed houses, sell our goods subject to the following disclaimer, it being that adopted by the American Seed Trade Association, i. e.: We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs, nursery stock, roots or plants sent out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once.

Dear Sirs: I am certainly being complimented on my fine long beans, Routledge Giants, some are over a foot long.

MRS. M. E. JENSON.

Treat your Bean Seeds with McQueen’s Culture. Read about it on page 39.
Routledge Giant Pole Bean

Of Superb Quality — Entirely Stringless

If you have not grown this bean, by all means do so this season. It is a quick grower, quite early and produces the MOST WONDERFUL LONG, PLUMP, MEATY PODS that are TENDER, BRITTLE and of DELICIOUS MILD FLAVOR when cooked.

It produces an ENORMOUS LOT of GIANT PODS from early in the season until frost.

We have been trying for years to grow enough seed to supply all our customers. Locally they keep green so late that the fall rains and frost spoil the seed.

The mammoth 10 to 12-inch pods of ROUTLEDGE GIANT picked in their prime are ENTIRELY STRINGLESS. The QUALITY IS SUPERB for canning or used fresh as a stringless “snap” bean. As a SALAD BEAN whole or sliced, and served with dressing it is DELICIOUS. The pale green pods are lightly penciled with carmine which disappears when cooked. See illustration, one-third natural size. Large pkt. 20c; ½-lb. 35c; lb. 60c

NOTE.—You better order early this year. We run out of “Giant” beans most every year.

A Few Convincing Reports

Ore., 1928.

Routledge Seed & Floral Co.

Gentlemen: After reading some of the letters from different farmers and gardeners in praising your Giant Pole Beans, I don’t believe there has been enough said. We planted some of them last year and sent for more.

Our neighbors declared they never saw anything that equaled them. I gave beans to my friends and canned 75 quarts from them, besides feeding them to the hay crew during second and third crop. Yes sir, the Routledge Giant is a wonderful bean. I had splendid luck with my Gladioli bulbs which I ordered from your store, Tube Roses and Water Lilies. We will always send to Routledge Seed & Floral Co. for our seeds and garden supplies. Sincerely,

MRS. FLOYD CAMPBELL.

FOR THE HOME GARDEN WHERE SPACE IS LIMITED POLE BEANS ARE MOST DESIRABLE AS THEY ARE MORE PRODUCTIVE AND REQUIRE LESS GROUND SPACE.

Although pole beans require a little more care and labor, they are, when properly grown, usually of longer bearing period than the dwarf sorts and are much more productive. Plant 6 to 8 beans in hills 3 feet apart. Use poles or heavy twine dropped from heavy overhead wires (hop-yard style).

Our "H. Q.” seed will produce the highest per cent of perfect heads and bring the "top" price.

Stock Beets or Mangels

Excellent winter feed for horses, cattle, sheep, hogs and chickens. When fed in combination with grain or mash they are worth almost as much, pound for pound, as the grain. This statement may seem absurd, but experience has proved that Mangels so aid digestion and assimilation by keeping the animals in a healthy condition, that they increase the feeding value of other feeds consumed, besides the nutrients the roots contain. Every farmer and poultryman should raise Mangels.

**Giant Yellow Eckendorf**

A new mangel of great merit. The roots are smooth, long and cylindrical in shape, very heavy, weighing up to 15 and 20 pounds each; grow two-thirds above the ground. The flesh is firm, crisp and solid, white in color and of high feeding value. (See cut No. 3.)

**Giant Half Sugar Mangel**

Yields as much per acre as the best Mangels, and twice as much per acre (bulk or roots), as the rich sugar beet. Roots grow very large above the ground. Smooth, creamy white in color and very nutritious. Easily pulled. (See illustration No. 1.)

**Golden Tankard**

An enormous yielder of weight per acre, and at the same time very nutritious; flesh deep-yellow, of fine shape, growing largely above ground, thus being easily harvested. (Same shape as cut No. 3.)

**Danish Sludstrup**

An improved variety, considered one of the best. Awarded first class certificate. Color, reddish yellow, and of a distinct type. It is very hardy, grows well above ground; is easily pulled; very nutritious. (See Cut No. 2.)

**Mammoth Long Red**

Very popular and much used. A large and heavy cropper. Dark red skin, with whitish flesh; grows one-half or more above the ground; roots quite regular; attain a very large size. (Same shape as No. 2.)

**SUGAR BEETS**

**FRENCH WHITE SUGAR**—The sugar beet most generally grown; most popular variety as it produces a large crop and is rich in sugar value. The young beets are fine for table use.

**PRICES:** Your choice of above varieties: Pkt. 10c; oz. 15c; 4 oz. 25c; lb. 65c

Pkt. 10c; oz. 20c; 4 oz. 40c; lb. $1.00

SWISS CHARD, Or Spinach Beet
GIANT LUCULLUS.—The leaves of this vegetable are used for “greens” and prepared in the same manner as Spinach; sometimes, however, the mid-rib is prepared like asparagus. Seed planted early in the spring will quickly produce plants from which leaves may be cut all summer. New shoots continually spring up and make a fast growth, while those plants which are allowed to grow on without any cutting will make large curly leaves, with thick, light-colored mid-ribs, which are delicious when stripped, cooked and served like asparagus. You should not fail to plant at least one long row in your garden.
Pkt. 10c; oz. 20c; 4 oz. 45c; lb. $1.00

BRUSSELS SPROUTS

PERFECTION OR DALKEITH.—Plants are of dwarf growth and stems are thickly set with large, solid sprouts. This variety is satisfactory.

(For Poultry and Rabbits)

Lettuce is an excellent food for chickens. It is just the “greens” they require to keep in the best of health. It yields as much or more than other green feeds, for when once cut it starts again or the leaves can be pulled off the lower stems as it does not make a head, but sends up a stout stalk three to four feet high just loaded with leaves. For large size do not crowd it. Transplant from the crowded rows.

SEMESAN.—This modern disinfectant can be applied in either the liquid or convenient dust form to prevent or control effectively a most diversified variety of parasitic disease and fungoid growths borne by VEGETABLE and FLOWER SEEDS, ROOTS, BULBS, GRAFTS and SOILS. Semesan is harmless to seed and plant life but extremely poisonous to disease and fungal organisms. Very effective in preventing "damping off" of young plants and for "hard rot" and "scab" on Gladiolus bulbs.

PRICES.—2 oz. 50c; 1 lb. $2.75; 5 lbs. $13.00; 25 lbs. $56.25; 100 lbs. $220.00; 300 lbs. $645.00.

CERESAN—For Grain Seeds.—Has proven effective in controlling seed-borne diseases as bunt or stinking smut of wheat; stripe disease of barley; loose and covered smuts of barley and oats and covered kernel smut of sorghum. It is the only dust treatment which has successfully controlled these destructive grain diseases. Ceresan does not injure the seed nor the grain drill. Only 2 oz. of Ceresan required per bushel of wheat, rye or sorghum, and 3 oz. for barley. Easy to apply, economical to use.

PRICES.—8 oz. 50c; 1 lb. 75c; 5 lbs. $3.00; 25 lbs. $12.50; 100 lbs. $49.00; 300 lbs. $144.00.

FOR THE HOME GARDENER.—A simple and easy method of using Semesan in a small way is to open the seed packet, put in a little Semesan powder, fold over the end of the packet and shake it. Then sow right out of the packet. The powder that does not adhere to the seed will drop in the seed drill and give further protection.

Marvel “Q. A.”
(Q. A. Quick Action)

ODORLESS FERTILIZER

For vegetable and flower beds, lawns, fruit and berry bushes, trees, shrubs and roses, ferns, palms and house plants.

The best fertilizer for the city gardener; clean and odorless. Remember, it's all fertilizer; no filler, almost 100 per cent soluble and a Marvel in action, a giant in strength, and the small amount necessary to use makes it the cheapest and most efficient high-grade fertilizer on the market, and last, but not least, it is odorless.

In “Marvel” we have a meritorious and odorless fertilizer, put up in concentrated form, thereby making it inexpensive to send by parcel post, express or freight. Being a concentrated fertilizer, only a very small amount is required to produce the largest yield, a spoonful to a plant, a handful to a hill of potatoes, etc.

Remember, a 25-lb. bag of Marvel Q. A. is equal in plant food to 100 lbs. of most any other commercial fertilizer on the market. A complete and balanced plant food, very rich and strong, therefore must be used with caution. (Always mix it well with the soil—not put it directly on seed or roots.)

PRICES.—2-lb. carton (not postpaid), 25c. P. P. w't. 2½ lbs. 10 lbs., $1.00; 25-lb. bag, $1.75; 100-lb. sack, $5.50. Full directions with each lot. Write for quantity prices.

MAIL.—If wanted by parcel post, add postage.

“Marvel” is odorless and 25-lb. bags will go by mail cheaper than express or freight in most cases. Descriptive booklet on request.

NOTE.—Three sacks of H. Q. SHEEP and one 25-lb. sack “MARVEL” mixed together will make a very rich combination fertilizer, that will prove highly satisfactory for all uses, as it would be very rich in plant food and supply the necessary humus for heavy soils. A WONDERFUL TOP DRESSING FOR LAWNS AND UNEQUALED FOR GENERAL GARDEN USE.

Imported Granulated

Granulated Peat Moss or Mull is a brown colored virgin soil, formed years ago by the growth and decay of mosses, aquatic plants, decomposed vegetable matter taken from the bottom of drained fresh water lakes. It is dried and packed under pressure in burlap wrapped bales about 3½ feet long and 2 feet square, weighing about 175 pounds. It being shipped to America from Germany and Holland in car load, yes, even boat load lots. It's a product nurserymen, horticulturists, florists and gardeners have wanted for years. It is a moisture retaining humus; an important aid in saving soil fertility. Adds humus to the soil, making the ground more pliable and improves the general texture and condition. Conserves moisture in light, sandy soil; contributes effective drainage and lightens heavy soil.

Used in landscape work, lawns, vegetable gardens, flower beds and in potting soil, as a mulch over seeds or plants. It is really a wonderful factor in many ways. In all garden books and magazines, especially of English origin, you read about the great value of Peat. We can supply in original bales, in coarse or fine grade, or we have it reground and put up in 2-bushel sacks.

Prices; Original Bale, $3.50. Fine ground in 2-bu. sacks, $1.25.

Gentlemen: In reply to your inquiry about Marvel Fertilizers will say I tried it on radishes, sweet peas, lettuce and cucumbers according to directions and obtained great results. As proof we had some vegetables in the same row without the fertilizer which did not do half as well. I am well pleased with the results and can recommend it very highly.

Dear Sirs: I want to tell you how well I like the results of Marvel Fertilizer.

I moved on a new place and the garden soil looked like nothing would grow. However, I got it in condition to plant and after sowing seed I used your Marvel Fertilizer on a few rows as an experiment. I was certainly amazed. The seed sown without was slower coming through and the plants were not as healthy looking.

Corn decidedly showed the effects of the Marvel Fertilizer.

Yours truly,

Gentlemen: I used Marvel Fertilizer on my Tomato vines and they set fruit thick like grapes. I had one cluster of five pounds. Nothing was ever seen like it in this low coast climate.

I also used it on my house plants and ferns and found it all you claim for it. Wonderful.

MRS. H. C.

Gentlemen: After using the sample and then a sack of your Marvel Fertilizer, I am convinced that it is truly marvelous in the cultivation of flowers, vegetables and lawn. I say this after experimenting with a number of fertilizers in the past. It is clean, handy and effective. Respectfully yours,

Use "H. Q." BRAND and have a beautiful lawn, lovely flowers, handsome shrubs and a profitable garden and orchard.

The genuine "H. Q." Brand, weed-free, is packed in paper lined printed burlap bags—worth almost double common stock.

DIRECTIONS FOR USING "H. Q."

VEGETABLES AND FRUITS.—If you want big crops of crisp, tender vegetables use "H. Q." Brand scattered broadcast and cultivated into the top soil 10 lbs. per 100 sq. feet; a handful per Individual plant; along the rows 1 lb. to every 10 feet; a pint per shrub, 5 to 10 lbs. per tree, etc. Field use 1,000 to 2,000 lbs. per acre.

FLOWER GARDENS.—Luxuriant green foliage and a wealth of vivid colored flowers quickly follow an application of "H. Q. Brand" Sheep Manure. Dig it deeply into the garden soil and mix a small handful with the soil under each plant or bulb and more for vines, shrubs and trees, depending on size. Applications during the growing season will put new life into your plants and prolong the blooming season.

LAWNS.—"H. Q. Brand" Sheep Manure produces a thick velvety green turf of lasting beauty. Give your lawn an application early in spring and you will be surprised at the new beauty it will develop. In making new lawns, scatter broadcast 10 lbs. to every 100 sq. feet and rake into the surface soil. On old lawns, rake well and use about 3 sacks for the average city lot with a house on it.

SHEEP MANURE—Ordinary Grade
If you want the common or ordinary grade from open corrals we can supply it in competition with anyone, but we do not recommend a cheap grade.

LIME—PULVERIZED
Lime is an indirect soil improver and a very valuable conditioner, and releases the plant foods. Its application on heavy or clay soil will open it up, make it lighter and more workable. Few people realize its value. Most Western Oregon soils need lime. Use 1 to 2 tons per acre on plowed fields. For garden or lawn about 2 lbs. per 100 sq. feet.

HYDRATED LIME.—This is put through a process that makes it finer and lighter than above. Quicker in action, richer in calcium, and well worth the higher price. Excellent for moss in lawns and general garden and farm lands.

Fertilizer Prices subject to market changes. Write for quantity prices when ready to buy.
FERTILIZERS—Continued

Prices: 100-lb. eks. $2: 5 to 10 sk. lots at $1.75. Ton price, write.

THE MODERN LEGUME INOCULATOR

Modern farmers demand modern methods of farming and agree that all legume seed should be inoculated. Good inoculation puts nodules on the roots of such plants as alfalfa, clover, peas, beans, soybeans and vetches. Nodules on the roots gather nitrogen from the air, that is, fertilizer at low cost.

McQUEEN'S INOCULATOR is the only nitrogen-fixing bacterial culture that is ABSOLUTELY GUARANTEED to give satisfactory results, or your money back (read guarantee on every package). This guarantee is your best protection—you are the judge. Use McQueen's with confidence, as thousands of others have done for many years.

McQUEEN'S INOCULATOR produces nodules; thus increases the crop—improves the quality—makes the soil a richer and better soil for crops that follow.

It's easy to use McQueen's—Apply it wet or dry—simplicity itself—takes only a few minutes' time to apply to seed. It is quality merchandise. Large volume of sales permits the following:

Nothing adds a greater air of refinement to a home than a beautiful, well-kept lawn. The planting of a few shrubs, roses and a liberal planting of flowers should not be forgotten.

**LAWN GRASS SEED**

Though we offer, separately, seed of many of the grasses suitable for the lawn, we consider as very erroneous the somewhat prevalent idea that any single variety of grass seed is preferable or equal to a mixture.

**R. R.'s EVERGREEN LAWN GRASS**

To obtain a good Lawn Grass Mixture, it is necessary that the best possible seed of fine grasses be used in the combination, embracing such varieties as are of neat, close growth, extreme hardiness, and adapted to produce a quick, permanent sod. Judicious selection of seed, knowledge of the habits, vigor, quality and hardness of varieties used in the mixture can only be gained by thorough and practical tests under different climatic and soil conditions. After many years' experience, we offer our pure, clean Evergreen Lawn Grass Seed Mixture, composed of a thoroughly balanced combination of various native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that will flourish under varied soil and climatic conditions, and which may be depended upon to produce a beautiful, compact, evergreen sod that will resist trampling and hard usage, and at the same time present that handsome, velvety appearance so much desired.

**R. R. EVERGREEN LAWN GRASS.**—Recognized by expert gardeners as the "highest quality." Portland's finest lawns have been grown from this mixture. PRICE, 65c per lb. Add postage by mail.

**KENTUCKY BLUE GRASS.**—Fancy, 65c lb.; H-Q. FOR LAWNS, 70c lb. Postage extra.

Note.—You better spend a few cents or a dollar extra on the seed you buy and have a fine lawn that you'll be proud of. Sow 1 pound seed to every 200 square feet for best results.

**WHITE CLOVER.**—Many gardeners like white clover mixed in lawn seeds and it is excellent, especially if your soil is heavy or poor. White clover grows quickly and acts as a nurse crop and protects the fine leaved grasses. Choice, 60c lb.; Extra Fancy for Lawns, 75c. Postage extra.

**EVERGREEN LAWN,** mixed with one-fourth FANCY WHITE CLOVER, 65c lb. Postage extra.

**LAWN BLUE GRASS,** with one-fourth FANCY WHITE CLOVER, 70c lb. Postage extra.

**CREEPING BENT GRASS.**—Imported. $1.00 lb.; PACIFIC or SEASIDE, $1.50 per lb.; FANCY RED TOP for lawns, 35c per lb. Postage extra.

**SHADY LAWN SPECIAL MIXTURE,** 75c lb. Postage extra.

Fertilize the Lawn Every Fall and Spring.

**FEED THE LAWN.**—Do not starve the grass if you want it to look green and velvety; use "Marvel" and H. Q. Sheep as per directions. See pages 37 and 38.

**FOR "BROWN SPOT" IN LAWNS**

Use "Dupont Semesan" as the most effective means of controlling "Brown Patch," which attacks the turf of golf courses, tennis courts and lawns. See page 36. Pamphlet free.

SPECIAL PASTURE MIXTURES

MIXTURE FOR BURNED-OVER LAND.—In grading and cleaning grasses and clovers we frequently find combinations that are difficult of preparation and while the seeds are often of excellent germination and quality, they cannot profitably be separated and cleaned, so we blend them to produce pasture mixtures suitable for sowing on burns and logged-off land. In ordering state whether for high or low lands. Price per 100 lbs., $15.00; special prices by the ton.

ALFALFA AND CLOVER SEEDS

ALFALFA

Reports prove that Alfalfa will grow in all parts of the West, but requires a deep, loose soil. Will not thrive on heavy clay or where there is hard pan. As soon as cut it immediately commences to grow. Excellent hay or pasture. Alfalfa, once established, is a crop so profitable that every farmer may well take great care to get a stand.

CHOICE ALFALFA.—Price: 10 lbs., $2.50; 50 to 100 lbs. at 24c; per lb., postpaid, 40c.

DRY LAND ALFALFA.—For high, dry, hot land, where irrigation is impossible.

Price: 10 lbs. $2.50; 50 to 100 lbs. at 24c; per lb., postpaid, 40c.

GRIMM ALFALFA.—This new variety is very hardy and will stand much more tramping and root injury. In many Western sections it is out-yielding the common variety and proving much more profitable. It is a little earlier and will do well in most all soils except undrained meadows. Not affected by extreme heat or cold, and does better in a wet climate than any other alfalfa. We offer the genuine true Grimm seed.

Prices: 1 lb., postpaid, 55c; 10 to 20 lbs. at 43c lb.; 100-lb. prices on request.

RED CLOVER

"H. Q." Fancy Seed, 10 lbs. $5.80; per lb., postpaid, 70c.

HUBAM CLOVER (Annual Clover)

Per lb., postpaid, 60c; 10 lbs., $4.60. Write for prices on larger lots.

SWEET CLOVER (Bi-annual)

Melilotus (Alba).—Excellent for pasture, hay or as a fertiliser to plow under to improve the soil. Grows luxuriantly on good soils, but it will also grow and thrive on thin, sandy soil, hardpan, gumbo, and clay; especially good on alkali land.

Sweet clover lives two years. It makes large, rapid growth the first season and can be cut for hay or pastured the last half of the summer. The second year it blooms, bears seeds and dies. Will make two crops of hay or a crop of hay and one of seed the second year. Can be plowed under either the first or second year, but to get the full value in humus the second season is better on account of the large roots that penetrate the lower layers of soil, thereby loosening it up and adding much humus and more nitrogen.

Sown very early in the spring. It does well sown either alone or with a light nurse crop of grain. Use 15 to 20 pounds of seed per acre.

Prices: 10 lbs. $2.00; 50 to 100 lbs. at 15c; per lb., postpaid, 35c.

FIELD PEAS

FIELD CORN FOR THE WEST

If you want to raise some good Field Corn, plant our Western grown Seed Corn. The strains we are offering you are acclimated and especially adapted to our short, cool summers. Eastern and Southern grown field corn seed is all right for green fodder, but of little value on this Coast. If you want the best corn for silo, or wish to raise matured, dry ears, for winter grain.

Routledge Pride of the West Field Corn

See Illustration from Photograph

Oregon grown; acclimated. A grand success in Oregon. We have been raising this variety for years, and by selecting the earliest ripening and best select ears, now have a strain that is unsurpassed for a large and profitable crop of large, well matured ears or for cutting for silo.

Routledge Pride of the West Field Corn is an early maturing variety, producing stalks from 6 to 8 and often 10 feet high, and large ears, 7 to 9 inches long. Cores covered with 14 to 16 rows of deep yellow kernels. It is a heavy yielder. Our strain has been greatly improved in the last few years.

We claim this is the earliest and heaviest yielding strain of Yellow Dent corn grown in Oregon. Try it and be convinced.

Large pkt. 10c; lb. 20c; 10 lbs. $1.50, postpaid; 100 lbs. $7.50.

SWEET FODDER CORN

All varieties of sweet corn possess very much more "sugar" than any feed sort, and this being the most important constituent, it necessarily follows that the corn holding this in greatest quantity has the greatest net value. Drill 1 1/2 to 2 bushels to the acre.

Large pkt. 10c; lb. 20c; 10 lbs. $1.50, postpaid; 100 lbs. $10.00.

BUCKWHEAT

MINNESOTA NO. 13

Well and favorably known in many sections of the West.

Northern Grown.—Large pkt. 10c; lb. 20c; 10 lbs. $1.25, postpaid; 100 lbs. $7.25.

Seed Corn Treatment

USE SEMESAN JR.—Protects seeds against rotting, permits earlier planting, speeds and increases germination, controls seedling blight, invigorates seedling growth, produces sturdier plants, reduces root and stalk rots, decreases corn down, improves ear and fodder quality, increases crop yields. See page 36. Special booklet on request.

OUR OREGON GROWN ACCILMATED FIELD CORN WILL PLEASE YOU
SEED OATS

When fancy, clean, heavy yielding oats are to be had at our reasonable prices it is poor policy to buy and plant common stock of unknown qualities simply to save a few dollars at planting time. We advise our customers to pay enough to get cleaned, true stock of varieties known to produce big and profitable returns.

If you can’t afford to buy enough to sow all your fields, get a start by planting an acre or two to save for seed stock and start this year. Prices subject to market changes.

SHADELAND CLIMAX.—This grand oat belongs to the tree or branching class, and is a vigorous, healthy grower of strong stuffing qualities. This is one of the heaviest yielding oats introduced to date. It does not produce much straw, but the yield of “thin hulled,” plump, heavy grain, even on high, dry land, is amazing. For early spring planting, large yield and quick maturity, Climax is a winner. If you live west of the Cascade Mountains you can plant “CLIMAX” fall or spring, any time the ground is fit, but where the climate is severe, spring plantings are best.

Prices: Per bu., $1.25; 100 lbs., write. By mail, postpaid, 4 lbs., 50c.

Write for quantity price, stating amount wanted.

SHADELAND ECLIPSE.—“ECLIPSE” is generally classed as a spring oat and is one of the best white side oat grown. Eclipse is enormously productive, early, very vigorous, and produces massive heads filled with medium size plump grains. “Eclipse” has been awarded many prizes. Can be safely planted in the fall as it is very hardy.

Prices: Per bu., $1.25; 100 lbs., write. By mail, postpaid, 4 lbs., 50c.

Write for quantity price, stating amount wanted.

GRAY WINTER.—Gray Winter Oats are very hardy, and are generally used for fall sowing, and are especially useful for sowing with vetch. The straw grows very long, is stiff and not liable to lodge. It is a head oat. The grain is dark gray, large and plump, and it yields well.

Prices: Per bu., $1.00; 100 lbs., write.

Write for quantity price, stating amount wanted.

WHITE SEED OATS.—Aside from the named varieties of fancy seed oats above, we can supply White Valley Oats at market price for fancy re-cleaned stock. Write for prices when ready to buy, stating quantity wanted or order at $1.00 per bu. and we will ship full value more or less according to market.

Prices subject to market changes. Will send full value of money sent or quote prices on request for prompt acceptance.

Speltz—Emmer

Sow in the spring, the same as wheat, at the rate of two bushels per acre. Cut when the grain is past the middle stage of milk, when it will make splendid grain and lots of rich straw hay. Tresh like wheat, only not so closely. Can be fed whole, rolled like barley, or ground.

Prices: 10 lbs. 75c; 100 lbs., write; lb., postpaid, 20c; 3 lbs., 50c.

Seed Wheat

Chicken Lettuce.—It is great for green feed.—See page 21.

Thousand-Headed Kale

JERSEY KALE—COW KALE

Recommended by agricultural colleges, granges and dairymen as one of the most valuable green forage plants for the Pacific Coast.

It grows rapidly and produces a mass of large, thick, curly green leaves, rich and succulent, which are eagerly eaten by stock and poultry. If planted early will produce valuable green feed during the dry summer months. Makes the most rapid growth when sown in the early spring, but locally it is extensively planted in summer and fall for winter feed. Will stand light freezing. Stalks can be cut off, or the larger lower leaves broken off, leaving the tops to grow. Under good cultivation plants will grow from 5 to 6 feet high. Sow 2 to 3 lbs. per acre, thinly in drills 2 to 4 feet apart and thin out. For late planting (July and August) it is better to have strong plants from earlier seeding and set out same as cabbage, 2 feet apart, in rows. Thin out later if plants attain extra large size.

EXTRA SELECT SEED

Sunflower

MAMMOTH RUSSIAN.—The best variety to grow for the seed or silage. Planted in or around the poultry runs they make a good shade during the hot summer days and at the same time produce a valuable feed.

Cultivation same as corn. For silage sow 12 to 20 lbs. per acre; for seed purposes, give more space to mature heads, 8 lbs. per acre. Heavy, re-cleaned seed, high germination.

Pkt. 5c; oz. 10c; 4 oz. 20c; lb. 40c; 10 lbs. $3.00, postpaid. Write for quantity price.

Kaffir Corn

An excellent fodder plant. Seed small and almost round, valuable poultry and pigeon food. It does best sown thinly in drills three feet apart.

10 lbs., $1.00; per lb., postpaid, 25c.

Rape, Dwarf Essex

We offer you true, pure seed. One of the best forage plants, on account of the large amount of green feed it will produce at the season of the year when everything else is dried up. It has yielded ten tons of green forage per acre, and has twice the feeding value of green clover. Sheep, swine, cattle and poultry eat it readily. Rape will do well on almost any soil. Prepare the ground as for turnips, and sow any time from May till September; or plant it with grain. Sow, per acre, three pounds in drills; or if broadcast, five pounds.

10 lbs., $1.25; 100 lbs., write; per lb., postpaid, 25c.

Seed Rye

When ready to buy Fall or Spring Rye Seed, write us for quotations on quantity wanted or send in your order and we will give full value.

10 lbs., 60c; 100 lbs., write; per lb., postpaid, 20c; 3 lbs. 50c.

Sugar Cane or Sorghum

A valuable crop to grow for fodder or ensilage, as it furnishes an immense tonnage to the acre.

10 lbs., $1.25; 100 lbs., write; per lb., postpaid, 25c.

Vetches

NOTE.—All Vetch is scarce and higher than usual. Buy early if you need any.

OREGON VETCH (Vicia Sativa).—Oregon's greatest forage plant. Often called Fall Vetch. Grown very extensively in Western Oregon and Washington, especially in the Willamette Valley and on the Oregon Coast. It furnishes an abundance of excellent feed, either green or dried. The seed is generally mixed with wheat, oats or rye, having a stiff straw to hold it up. Sown alone 85 pounds, or 60 pounds with a bushel of grain, per acre. Sow in the fall or early spring.

Prices; 10 lbs. $1.00; 100 lbs., write; per lb., postpaid, 20c.

HUNGARIAN VETCH.—Becoming more popular each year on account of its strong, healthy growth. Its aphis resistance is probably the largest single factor toward making it a more generally grown vetch in Western Oregon.

It's a heavier yielder, both in hay and seed, than any other vetches grown here under similar conditions.

Prices; 10 lbs. $1.00; 100 lbs., write; per lb., postpaid, 20c.

HAIRY SAND OR WINTER (Vicia Villose).—This variety thrives on poor, arid, sandy soils. It is sown in the fall or spring, mixed with rye, which serves to support the plants. Sow 20 pounds per acre.

Prices; 10 lbs. $2.00; per lb., postpaid, 40c; 100 lbs., write.
HOW TO RAISE FLOWERS SUCCESSFULLY FROM SEEDS

The above is the title of a two-page leaflet we have issued for our customers. It tells HOW, WHEN and WHERE to plant. It is free to all.

IF YOU WILL MEMORIZE the following definition of the flower classes THEY WILL HELP YOU WONDERFULLY in the selection of seeds and your garden work in general.

ANNUALS

These grow from seed, flower, mature their seed, and die in one year, or in other words, the same season.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Hardy Annuals are those which can be sown in the open ground in early or late spring, or started inside and transplanted if very early flowers are desired.

BIENNIALS

These grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Half-Hardy Biennials require the protection of a cold-frame or cool-house during the winter.

PERENNIALS

These grow from seed and continue flowering annually for many years after the first season. Some varieties flower the first season if started very early. Sow in the fall for early flowers next year.

Hardy Perennials can remain in the open ground during winter without protection.

Zinnias

The Zinnia is one of the most brilliant, showy and satisfactory annual flowers. It has long been a general favorite, but with the wonderful new and "late creations" produced by "Zinnia specialists" in the last few years it now is probably the most popular flower of the day.

For mass planting, cut flowers and decorations they are unsurpassed, producing a wonderful display from July until heavy frosts.

BEAUTIFUL HARDY LILIES

These are the most fragrant, beautiful and stately of all flowers produced from hardy bulbs. We list only the hardy varieties that will give planters much pleasure and happiness. Ideal locations are in the shrubbery or herbaceous border, where the roots are sheltered from the hot sun. Groups of six or more lilies of a kind, here and there in such situations are most effective. Large isolated clumps or beds of the varieties Auratum, Henryi, Speciosum, Tigrinum, etc. are also very beautiful. They should be planted 6 to 8 inches below the surface in light soils, or 4 to 5 inches below in heavy soils; in the latter case the bulbs should be surrounded by sand to facilitate drainage.

SUCCESS WITH LILIES is not difficult if you give proper attention to the preparation of the soil. They should be planted in a rich loose loam or sandy soil that is well drained. Lilies do not like wet feet. Well-drained soil is very important for best results. If your soil is heavy and not well drained, dig deeply and work in a liberal amount of sand and peat moss. For fertilizer use H. Q. Sheep Guano with Bone Meal, but all fertilizer must be thoroughly mixed with the soil so as not to come in contact with it.

A-PLATYPHYLLUM.—Larger than the Auratum; same type flower; color cream white, lighter band and white dots. The giant of the lily family. Very handsome and fragrant.

PLANTING DIRECTIONS

Hardy lilies may be planted on the Pacific Coast from March to August, depending on local weather conditions.

Mosquitoes and Goldfish.—There will be NO mosquitos where pools are stocked with goldfish.

How to Plant.—Boxes, 2 feet square and 1 foot deep, should be filled with good, rich garden loam, well compacted. Well decayed manure may be used to enrich the compost—1 part to 3 of soil. A 6-inch pot of bone meal to each box is very useful also. In planting, simply push the root horizontally into the mud until the growing end is flush with the surface. Another method is to spread the soil over the entire bottom of the pool, thus giving more root room to the plants.

Water lilies grow best where there is a foot of water over the plants and about the same amount of soil below. All pools should be made at least 2 feet deep; a 4-inch cement bottom and a 5-inch wall is advised. Tub culture is also successful.

CHOICE HERBACEOUS PAEONIES

Fine, hardy plants, rivaling the Rose in perfection of bloom, color and fragrance. They are at home in any climate or soil, but thrive best in deep, rich, well-drained loam. They make a gorgeous display. The Paeony is perfectly hardy. Plant in the fall or early spring and do not cover the crown of the roots over 2 or 3 inches.

Our collection of varieties is unsurpassed. Every one is a beauty of sterling merit. We send out strong roots for quick results.

Barker Weeder, Mulcher and Cultivator

The Barker is three garden tools in one. It has no delicate parts to get out of order and is always ready for use. For deep cultivation use the machine as shown in the illustration, and for weeding and pulverizing the top soil you simply turn it over. No changing or adjusting necessary. The revolving reel blades, working in combination with the stationary weeder knife, destroys the weeds, pulverizes the clods, aerates the soil. The machine is so adjusted that there is about \( \frac{1}{8} \) of an inch space between the reel blades and the stationary knife, the blades revolving over the knife, granulate the top crust so that the soil pours evenly over the knife, leaving a level, perfect soil mulch.

You can do this work as fast as you can walk. We recommend the Barker; it's fast and easy work to operate it.

If the top soil is baked or hard, use the weeder side first and then reverse it and use the cultivator teeth for deeper work. Long, strong handle with cross bar, hand grip.

The Barker works to perfection in all soils except large gravel or rocky soil. Descriptive and illustrated folder on request.

Read These Two Reports

Dear Sirs:

About a year ago, after much loss of time and wasted effort with gopher traps and poison in an effort to rid my place of gophers and moles, I purchased two of your "NEVER-FAIL GOPHER GUNS" with the result that at the present time I do not know of one gopher or mole on my place of ten acres.

In that time I have destroyed over two hundred gophers and thirty moles and have never failed.

Yours truly,

JOHN W. HAAS.

Dear Sirs:

It is a pleasure to write and tell you that with the gopher gun I got from you some time ago I have been able to rid my place of gophers and moles. Before I purchased the gun I was annoyed greatly by gophers and was unable to catch them. By the use of the gun I have been able to completely exterminate them in my property, and feel that the gun is indispensable and would not be without it for many times its price.

Very truly yours,

GALE S. TROUT.

AUTOMATIC CHICK GREASER

(See Illustration.) Let every chick rid itself of head-lice. The large lice that collect on the heads of young chicks cause them to droop and die. Save time and chicks by using an Automatic Chick Greaser. Saturate the wick with Conkey’s Head Lice Ointment or a mixture of two-thirds lard and one-third kerosene, then put feed in the pan and every chick will get its head thoroughly greased in a very few minutes.

Can be moved from one pen to another.
Price $1.25, or $1.35 postpaid. Head-Lice Ointment, 10c and 25c tube, postpaid.

PORTABLE ELECTRIC EGG TESTER

If you have electric service this is the only egg tester to use. The searchlight effect on the air cell illuminates the entire contents. Weak or dead germs, blood spots, cracked shells and clear, unfertile eggs are instantly detected after the third or fourth day of incubation.

Absolutely guaranteed and used successfully by the largest California hatcheries. Price, $5.00, postpaid. DESCRIPTIVE LEAFLET ON REQUEST.

The operation of this scale is so simple that a child can operate it. By placing an egg in the cup the beam will automatically adjust itself. The lowest visible number on the blades will indicate the weight in ounces of one dozen like eggs. Hence this egg should be placed in a carton, or case, which is properly marked for that particular grade of eggs. Price $3.00.

STANDARD.—Very simple in construction, yet very accurate and quick. Made in two sizes, 19 and 22-ounce grades. State which grade or size is wanted. See illustration.

GILT EDGE (See cut.).—Used throughout the United States. Extra well made, yet simple in construction; quick and easy to operate; weighing capacity, 18 to 29 ounces per dozen. Price $1.25, postpaid $1.40.

AHLER’S INVISIBLE EGG SAVER

The Egg Saver is a boon to the egg producer, as well as to the housewife, who might want to put some eggs away, while they are cheap.

A strong point is that the quality of the eggs remains perfect. Eggs treated by the Egg-Saver system will boil or poach and the white will whip the same as a fresh-laid egg. Experts cannot tell them from fresh eggs.

Six to seven gallons of water and 1½ pounds of powder will treat 30 to 35 dozen eggs. As you gather the eggs, drop them into the solution, if you market them, let them dry without wiping, so as not to break the seal of the pores.

It is immaterial whether the eggs have been in the solution one day or one month. They will come out all alike and you will have perfect eggs in every respect.

Egg dealers, large or small, cannot afford to be without Invisible Egg Saver.

Full directions are given on each package.

Prices: ½-lb, pkg., 50c; 1½-lb., $1.00; postage extra. Write for bulk price if interested.

PROGRESSIVE OAT SPROUTER

No other green feed takes the place of the wonderful quickening virtue of the young, growing oat sprouts.

The State Experiment Stations and the national egg laying contests all feed Sprouted Oats.

If you want lots of eggs in winter when the price is high and in summer when the grass is dry, feed Sprouted Oats.

THE PROGRESSIVE is an ideal sprouter for large flocks.

The entire sprouter, with exception of frame work, is made of heavy galvanized steel. No checking, warping, as with the wood constructed sprouters. The heavy coated galvanized steel will last for years. Frame work is of western red cedar and nicely painted. A neat substantial machine that can be operated in any room of the house, or the feed room of your poultry house.

In operation the dry oats are placed in the soaking tank at the top and then covered with water. The next morning the tank is drawn forward about four inches and inverted, dropping the soaked oats into the first top section, and soaking tank refilled. The next morning the sliding metal bottom of the top section is drawn forward and the oats drop into the second section. Metal bottom replaced and soaking tank again emptied into top section. This operation is continued daily, the sprouted grain being removed each morning from the drawer at the bottom and new supply added to soaking tank.

The surplus water from soaking tank drains down through each section and supplies the extra moisture needed to maintain the humidity in the air in sprouter and around the germinating grain. Any surplus water drains out a small pipe at bottom, none of which comes in contact with the lamp.

Portland prices, with full instructions: No. 9, for 100 hens, $9.00; No. 1, for 500 hens, $21.00; No. 2—Double, for 1500 hens, $47.50.

NEW MODEL CLOVER CUTTER

Cuts perfectly 1/2-inch lengths, dry or green hay or feed. Cutter bar is adjustable and easily accessible. The four 7-inch spiral steel knives can readily be removed for sharpening.

All made of iron and steel, strong and durable; has large capacity, runs unusually easy and will do perfect work indefinitely.

Length 28 1/2 inches. Weight 70 pounds.

Price $18.00.

CHLORINE

The greatest specific and conditioner for poultry. Fowls fed Chlorine will keep healthier and produce more eggs during the season. The mortality will be much less and they will go through the moulting season in far better condition.

For Baby Chicks.—A preventative and specific for white diarrhoea, codidiosis (bloody diarrhoea), cholera, roup, limb and other germ diseases, intestinal troubles, indigestion, and worms. Use it from the start as a preventative. It will pay big returns. They will brood better and have more “pep” and grow into more profitable birds.

For Laying or Breeding Fowls.—Use six tablespoonfuls Chlorine to one hundred birds, a pint to five hundred birds, three days a week. Many of the largest poultrymen on the Coast and throughout the United States are continuous feeders of Chlorine. It will aid fowls to obtain full nutriment of food consumed.

PRICES.—6-oz. bottle, 40c; postpaid, 45c; 16-oz. bottle, 70c; postpaid, 80c; 1 gal., $2.50; 5 gal. $11.25; 30-gal. bbl. $45.00. Full directions on each container. Barrels—Prices on request.

PARROT FOOT CHAINS, 50c; PERCHES, 50c; SWINGS, 35c.

The flowers bloom and fade away; books are read and then cast aside and soon forgotten, and we tire of the so-called pleasures of life and demands of society. A parrot is always amusing and interesting, and it is a pleasure to watch it develop from day to day its powers of mimicry. It will soon learn to greet you with "Good morning." Such a pet will stand the test of time and grow in favor constantly.
ROUTLEDGE H. Q.—“Highest Quality”—BIRD FOOD

We are making a specialty of Bird Foods and Remedies and carry in stock the largest and only complete line in the Northwest. Our rapidly increasing trade shows that the public appreciates the opportunity to get H. Q. “HIGHEST QUALITY” foods and remedies of “MERIT” for their pets.

H. Q. ROLLER BIRD SEED

Our own special mixture for American, Hartz Mountain and St. Andreasberg Canaries; especially prepared for the singers. Contains no hemp, but the correct proportions of highest quality re-cleaned Canary, Sweet Rape, small Golden Millet and a few other seeds to give health and “pep” to the singers.

He is shy yet, of course, but I am sure he is just the bird I have been wanting. I thank you kindly for selecting such a little beauty for me and will send as many orders as I can for others.

H. Q. MANGE REMEDY

Our Mange Remedy consists of a Germicidal Ointment, a Neutralizing Healing Ointment and a Sanitary Wash.

The treatment consists of from three to six applications of the germicidal ointment followed by the application of the neutralizing healing ointment. It is quite essential to disinfect the quarters of the dog in severe cases, to bathe the animal with a disinfecting wash before treating. For this purpose there is included a bottle of our H. Q. Dog Wash.

We have experimented with these two ointments for a number of years. We have selected the most gratifying cases of mange for our experiments, cases which have not responded to other treatments and with such gratifying results that we have given it the seal of our approval and given it a place in our high-class line of remedies.

It may be of interest to you to know that the germicidal ointment is essentially the same as was successfully used for years by a noted physician in the treatment of itch, eczema and kindred ailments.

The formulae for the neutralizing healing ointment is a combination of bland and stimulating oils recognized for their healing properties.

The Dog Wash has an enviable reputation among dog lovers and is quite eligible to travel in a class with these two high-class ointments.

We strongly recommend this triple combination in treatment of the dreaded canine disease, Mange.

Price, complete with full directions, $2.00.

From Oregon, 1928.

GOLDFISH, GLOBES, FOOD, ETC.

We are the largest retail and wholesale dealers in Fancy Gold Fish in the Northwest, often having a thousand or more on display in our large aquarium at our stores.

An aquarium is a beautiful ornament. It suits everywhere—parlor, library, dining and sitting room, and may indeed be introduced in apartments of the sick. The bright, active Gold Fish are very interesting, a perpetual source of amusement for both old and young folks. Children are always delighted with them.

CARE OF GOLD FISH.—Very simple and little trouble. The water in the aquaria must be changed from one to six times a week, depending on the size of the globe, number of fish and the temperature of the room. When fish come to surface and gasp for air they should be given fresh water. Keep the aquariums out of hot sunlight and in a cool place.

Price List of Fish

AMERICAN GOLD FISH.—Very hardy and lively. Each, very small, 25c; small, 35c; medium, 50c; medium large, 60c; large, 8 to 4 inches, $1.75; extra large breeders, $2.00 to $4.00; fancy tri-colored, 50c to $1.50 and up.

JAPANESE GOLD FISH—FAN-TAILS.—These have spreading tails of a delicate lace-like appearance, very showy and attractive. Price, small, 35c; medium, 50c; large, 75c to $1.00 and up to $3.00. Tri-colored, golden-red, pearly-white, and black, showing two or all three colors, 75c to $1.50 each.

COMET.—Similar to the American, but the tail is very long, graceful and delicate. Very active. Price each, 50c, 60c, 75c, $1.00 and $1.50.

CHINESE TELESCOPE.—Curious and attractive on account of the large, elongated eyes, having the appearance of a telescope. Flowing double tails. Very rare. Price each, 5c to $1.00.

Aquarium Scavengers

TADPOLES.—2 to 3 inches, 15c
HARD SHELL ROUND SNAILS.—15c and 25c.
BABY TURTLES.—About 2 inches across, in season June to December. Price, 50c or postpaid 60c

AQUARIA PLANT OR FISH MOSS

GOLD FISH FOOD

Prices, postpaid, 5c less at our store.

FEEDING.—The only safe diet is our prepared Fish Foods, fed daily and only what they will eat up quickly. Don't overfeed.

H. Q. NATURAL FISH FOOD.—Our own make. A combination of foods properly blended to assure the healthy condition of the fish. It is rich in body-building elements, which must be supplied to the fish. (See cut.) Per box, 20c.

GROUND SHRIMP.—Prepared to keep: excellent change for fish. Price, 30c.

ANT EGGS.—For fish and birds. 30c.

JOSEPHINE L. KLOTZ.
FISH GLOBES—AQUARIUMS

CANNOT BE MAILED.

Note.—Packing charge 10c per gal. extra.

BLOWN GLOBES.—These are the highest quality of glass blown—smooth and perfect. Each, ½-gal., $1.00; 1 gal., $1.50; 2 gal., $2.25; 3 gal., $3.25.

SQUARE AQUARIUMS—ALL GLASS

The latest thing in the square or oblong style. The old styles with the metal corners (as shown in illustration), unless handled with the most careful care, would invariably leak and cause much trouble.

The new, all glass, are made by special process, are of heavy polished glass, smooth edges and corners, and when filled with water are 'clear as a bell.'
